November 2026

New carbon emission data & GLEN conference call

Welcome back to another edition of our newsletter!
We are excited to share the news that we have published **additional data** from the first wave of our study, focusing on the **CO_2 emissions** of our respondents. We would also like to invite you to our **first GLEN User Conference**, which will take place **on 10–11 June 2027**.

Measuring our respondents' carbon footprints

Want to dive deeper into individual greenhouse gas emissions? Our CO_2 module is a great place to start! The data were collected in 2025 as part of Wave 1a. Our CO_2 emission estimates, measured in kilograms of CO_2 equivalents (kg CO_2e) per year, allow you to explore the four domains in greater detail:

- **Housing**: Heating, electricity, construction and maintenance, second home, and overall emissions
- **Transportation**: Private transport, public transport, flights, and cruises
- **Diet**: Energy requirement and dietary consumption
- **Consumption**: Household and individual goods, pet keeping, and accommodation

The CO_2 data must be combined with the data from our initial release, but will also be available in the scientific use file from data release 2.0 onwards, which will be available in July 2027.

You can also find a new technical report on the data curation of the carbon dataset and a new working paper using the CO_2 data on our website.

➔ **Technical Report:** Ries, F., Behringer, T. & Diekmann, A. (2026). Measurement of Carbon Emissions. Documentation of the GLEN CO_2Module. GLEN Technical Report No. 4. https://doi.org/10.11588/heidok.00039413

➔ **Working Paper:** Diekmann, A., Ries, F. & Behringer, T. (2026). Inequality of CO_2 Emissions. Carbon Footprint, Socioeconomic Correlates, and Adoption of E-Technology, GLEN Working Paper No.4. https://doi.org/10.31235/osf.io/td4c3_v1

How to access the data?

To access the data, simply download and fill out the user contract available on the GLEN website and send it back to us (info@glen-studie.de). Once we receive your signed contract, we will provide you with access to the data.

What's next?
The 1st International GLEN User Conference in Heidelberg on June 10-11 in 2027!

We are pleased to announce the 1st International GLEN User Conference, which will take place as part of the scientific program of the GLEN project.

The conference provides environmental social researchers with the opportunity to present and discuss their research. Moreover, it offers a forum for the GLEN user community to share their experiences working with the data, exchange ideas with other users, and engage directly with the GLEN team.

We invite researchers from all social science disciplines to submit their abstracts for oral and poster presentations. We particularly welcome research using GLEN data on any substantive or methodological topic; submissions of work using other social science data with a clear focus on environmental issues are welcome as well.

Submission deadline is 15 January, 2027. Please send your abstract (up to 300 words) to *conference@glen-studie.de*. Abstracts should indicate whether an oral or a poster presentation would be preferred.

Further information on the scientific program, conference organization, and registration will soon be available on *www.glen-studie.de/events*.

For any questions, please contact the conference team (Dr. Christiane Bozoyan, Dr. Claudia Schmiedeberg, and Anna Joraschek) at *conference@glen-studie.de*.

Meet our data - workshop in Bamberg

We are also happy to announce our first Meet the data Workshop which will take place alongside the Workshop on **Inequality in Ageing and Health in the Context of Climate Change** on **11-12 March 2027** at the **University of Bamberg.**
You can find more information on the workshop here.

Additionally, Dr. Manuela Schmidt as part of the GLEN Team will present:
Who Can Protect Themselves? Housing Conditions and Social Inequalities in Heat Protection

Other places to find the GLEN team…

Our researchers will be involved in the European Survey Research Association (ESRA) Conference 2027, hosting the following sessions:

- **New Data Sources for the Study of Climate Change and Society**
- **Innovations in Nonresponse Prediction and Response Enhancement in Survey Research**
- **Conceptualizing, Measuring, and Triangulating Space in Survey Research**

We would love to meet people from the GLEN User community in one of our sessions!

Let's stay connected!

Feel free to reach out to us anytime via email (info@glen-studie.de) if you have any questions regarding or project and data, or connect with us at our upcoming conference, workshop and sessions.
